

David L. Moonie & Co.

BUILDING

A Design Build Project

PROJECT HIGHLIGHTS

The David L. Moonie & Co. building, a 5,785 square foot, single story office building with 9' and 10' ceilings throughout, is striking from the moment you enter it. The 800 square foot atrium lobby with fireplace (bottom photo) provides warmth as well as natural lighting from high windows on the walls near the 20' ceiling. Designed for a local accounting firm, this structure has five partner offices, four staff offices, a large conference room flanked by two smaller meeting rooms, and three restrooms. The breakroom, filing room, library (below) and support rooms feature custom cabinetry from Danco's Cabinet Shop.

CLIENT COMMENTARY

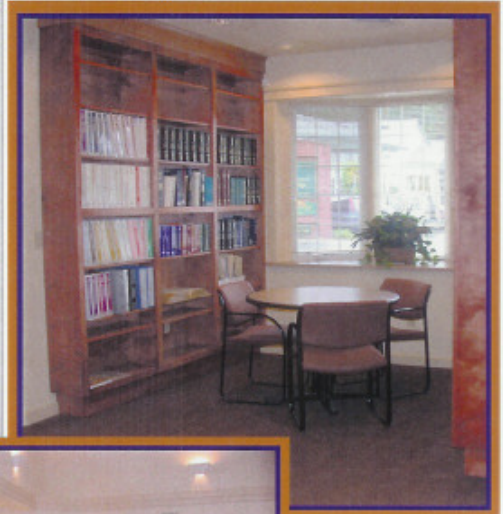

"Everyone in [Danco Builders] made this a positive experience, and really understood how important this project was to us. This experience and the building exceeded our expectations.

It's hard to believe that we moved in one year after we started preliminary discussions. I don't think there's another builder or developer that could have accomplished this.

Thank you for a great job."
